UPDATING INFINITY WITH USB

USB USAGE

CREATE A USB PROFILE

You can use any USB drive of any size. Please make sure that your USB drive is formatted with FAT32. Insert the USB drive into the USB slot on the PIU machine. Infinity will “chime” when it recognizes your USB drive. In addition the prompt on the title screen will change from “INSERT YOUR USB DRIVE” to “READY”.

After a full game of PIU INFINITY is played, data will be created on the USB drive. When the game is over remove your USB drive and take it to your computer. Look for the files that the PIU machine created on your USB drive. For this manual, we will refer to the USB drive as “E:/”, but it may actually be assigned a different drive letter in your case.

The files created for use with PIU INFINITY will be located in “E:/Pump It Up Infinity/”
Below is an example of what you should see in the “Pump It Up Infinity” folder:

FREQUENTLY ASKED QUESTIONS:

- What if the game won't recognize my USB drive?
 - *Either the USB drive is incompatible, or it may need to be formatted.*
- Can I move these files & folders around on my USB?
 - *No.*
- How do I take a screenshot?
 - *While on the Judgement / Score screen, alternate pressing up-left and up-right on the dance pad repeatedly until a shutter sound is heard.*

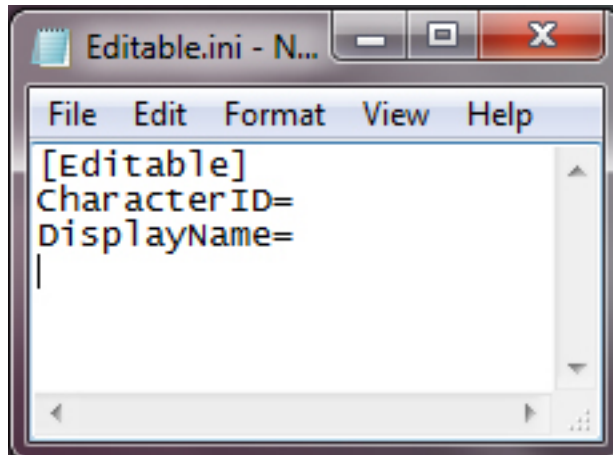

USB USAGE

CUSTOMIZE YOUR USB PROFILE

Locate "Editable.ini" and open it using a text editor. (Notepad, Word, etc.)

This file tells the machine what avatar to choose, and what name to display on the machine.

You should see the following:

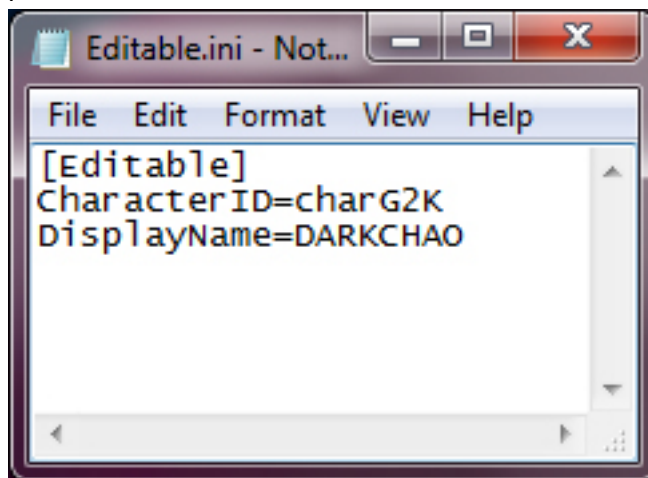

```
Editable.ini - N...
File Edit Format View Help
[Editable]
CharacterID=
DisplayName=
```

CharacterID= Here you will type in the code for your avatar of choice.

DisplayName= Type your display name of choice.

Here's an example of an Editable.ini file that has been customized:

```
Editable.ini - Not...
File Edit Format View Help
[Editable]
CharacterID=charG2K
DisplayName=DARKCHAO
```

Customize Editable.ini to your liking and save the file.

Next time you play, your changes will be visible.

TAKING A SCREENSHOT

You can take a screenshot of your performance and save it to your USB drive for use on your computer. While on the Judgement / Score screen, alternate pressing up-left and up-right on the dance pad repeatedly until a shutter sound is heard.

Screenshots are saved in "E:/Pump It Up Infinity/Screenshots"

USB USAGE

UPDATING INFINITY WITH USB

You can update your local PIU INFINITY machine to the latest version by downloading an update online and placing it on your USB drive.

Observe local arcade machines software version in the upper right of the title screen.

Download the latest update(s) at <http://piudev.info/infinity-update/>

You will need to acquire any updates leading up to the latest one. (ex: if the machine has 1.03 and the latest version is 1.06, you must download 1.04, 1.05, and 1.06)

Place the update files on the root of your USB drive. (ex: E:/inf105.piu)

Insert one credit into the machine and insert your USB. Infinity will find the update automatically and start to install once the update is verified. The machine may restart several times if more than one update is being installed.

Your credit will remain in the machine after the machine is fully updated.
